# The Packaging By Design Advantage

Packaging By Design is a **full service custom, wide web printer and converter of flexible films** providing the highest quality and product protection that customers expect.

We supply flexible packaging for various markets such as confectionery, food, salty snack, pet food, medical, and industrial.

PBD continues to be an industry leader with state-of-the-art printing, laminating, and slitting equipment.

In addition, Packaging By Design uses 100% environmental friendly water-based inks and adhesives for production, not to mention our Quality Control Department that ensures your specifications for each job are met with every order.

## Flexible Solutions

Packaging By Design can adjust to any flexible packaging order and specializes in outstanding turnaround time. With print quantities as low as 500 LBS, using our stocking program, and maintaining excess capacity at all times allows us to react to our customer's immediate needs within days, not weeks!

## DESIGN SERVICES

PBD has the capability of developing design concepts and taking them completely through the fulfillment process to a complete product. We have accomplished this many times in less than 3 weeks.

## PROTOTYPE PACKAGING

From quantities of one to several thousand impressions, PBD can provide you with high quality digitally printed prototypes and mock production packaging for test marketing, special promotions and trade shows.

OFFERING  
**UNMATCHED
